

Strategic Committee

Meeting every quarter

Purpose: To have oversight and steer the activities of RUK Working Groups, ensuring they deliver to their objectives and the wider RUK strategy. To shape RUK's work in a number of cross-cutting areas, by developing policy positions and feeding into research and analysis.

Key priorities (2025–2027)

- To monitor activities and progress of Working Groups (WGs), ensuring they deliver to time and develop robust positions on issues within their remit. To drive coordination across WGs, ensuring RUK positions are consistent.
- To be responsible for developing and evolving RUK positions and narratives on key cross-cutting areas:
 1. Reducing curtailment and constraint costs
 2. Strategic Spatial Energy Planning
 3. Long-term CfD and route to market evolution across technologies
 4. The cost of renewables, impacts on bills and the socio-economic footprint of the sector

Wider governance/TA/industry interaction

To deliver on some of the priorities above, the Strategic Committee may also provide direction and assign work programmes to WGs.

The Strategic Committee will also be responsible for providing final sign-off and monitoring the work programme of WGs, and these programmes will be agreed by WG Chairs and Vice-Chairs once appointed.

Engagement priorities

Focus on strategic priorities – working groups will manage “day to day” engagement
